GAP packages

Some GAP packages of interest to combinatorialists:

GAP packages

Some GAP packages of interest to combinatorialists:

- **GRAPE** – A package for computing with graphs and groups.

GAP packages

Some GAP packages of interest to combinatorialists:

- **GRAPE** – A package for computing with graphs and groups.
- **Digraphs** – A package for digraphs and multidigraphs.

GAP packages

Some GAP packages of interest to combinatorialists:

- **GRAPE** – A package for computing with graphs and groups.
- **Digraphs** – A package for digraphs and multidigraphs.
- **Design** – A package for studying block designs.

GAP packages

Some GAP packages of interest to combinatorialists:

- **GRAPE** – A package for computing with graphs and groups.
- **Digraphs** – A package for digraphs and multidigraphs.
- **Design** – A package for studying block designs.
- **GUAVA** – A package for computing with codes.

GAP packages

Some GAP packages of interest to combinatorialists:

- **GRAPE** – A package for computing with graphs and groups.
- **Digraphs** – A package for digraphs and multidigraphs.
- **Design** – A package for studying block designs.
- **GUAVA** – A package for computing with codes.
- **AssociationSchemes** – A package for working with association schemes and homogeneous coherent configurations.

GAP packages

Some GAP packages of interest to combinatorialists:

- **GRAPE** – A package for computing with graphs and groups.
- **Digraphs** – A package for digraphs and multidigraphs.
- **Design** – A package for studying block designs.
- **GUAVA** – A package for computing with codes.
- **AssociationSchemes** – A package for working with association schemes and homogeneous coherent configurations.

- The PAG manual (version 0.1.2) is available at `https://web.math.pmf.unizg.hr/acco/publications.php`
- The current installation files (version 0.1.4) can be obtained from the authors. Please write to vedran.krcadinac@math.hr.

PAG in action: Constructing block designs

A t-(v, k, λ) design is a v-element set V of points and a family $\mathcal{B}$ of k-subsets of V called blocks such that every t-subset of V is contained in exactly λ blocks.

PAG in action: Constructing block designs

A t-(v, k, λ) design is a v-element set V of points and a family $\mathcal{B}$ of k-subsets of V called blocks such that every t-subset of V is contained in exactly λ blocks.

An automorphism of the design is a permutation of V mapping blocks on blocks, i.e. preserving $\mathcal{B}$.

PAG in action: Constructing block designs

A t-(v, k, λ) design is a v-element set V of points and a family $\mathcal{B}$ of k-subsets of V called blocks such that every t-subset of V is contained in exactly λ blocks.

An automorphism of the design is a permutation of V mapping blocks on blocks, i.e. preserving $\mathcal{B}$.

Goal:

Construct t-(v, k, λ) designs with a prescribed group of automorphisms G.

PAG in action: Constructing block designs

A t-(v, k, λ) design is a v-element set V of points and a family $\mathcal{B}$ of k-subsets of V called blocks such that every t-subset of V is contained in exactly λ blocks.

An automorphism of the design is a permutation of V mapping blocks on blocks, i.e. preserving $\mathcal{B}$.

Goal:

Construct t-(v, k, λ) designs with a prescribed group of automorphisms G.

How to choose G ?

KramerMesnerSearch: behind the scenes

`KramerMesnerSearch`: behind the scenes

- Generate G-orbits of t-subsets and k-subsets of V [GAP code]

KramerMesnerSearch: behind the scenes

- Generate G-orbits of t-subsets and k-subsets of V [GAP code]
  - $\rightsquigarrow$ Orderly algorithm using GAP package **images**
  - $\rightsquigarrow$ Algorithm for short orbits

KramerMesnerSearch: behind the scenes

- Generate G-orbits of t-subsets and k-subsets of V [GAP code]
  - $\rightsquigarrow$ Orderly algorithm using GAP package **images**
  - $\rightsquigarrow$ Algorithm for short orbits
- Compute the Kramer-Mesner matrix [GAP code]

`KramerMesnerSearch`: behind the scenes

- Generate G-orbits of t-subsets and k-subsets of V [GAP code]
  $\rightsquigarrow$ Orderly algorithm using GAP package **images**
  $\rightsquigarrow$ Algorithm for short orbits
- Compute the Kramer-Mesner matrix [GAP code]
- Solve 0-1 system using A. Wassermann's program `solvediophant` or our own backtracking solver [interface to C programs]

`KramerMesnerSearch`: behind the scenes
